

Life Mobilizer – Device Support Service

Industry leading device support

Key Operator Benefits

- Onboarding Program tailored for fast-time-to-market availability of new configurations
- Receive regular device support updates downtime free
- Interoperability partnerships with all leading device manufacturers
- Ongoing R&D to support more synchronisation types
- O3SIS SyncML Client for enabling of synchronization on Smartphones with no or proprietary native Sync capabilities

Key End User Benefits

- Real time, scheduled or automatic mobile device synchronization or backup & restore functionality
- Consistent synchronization results ensured between varying address books of mobile phones, web services and PC
- Convenient Over-the-Air phone configuration support including manual instructions
- Hassle free installation and configuration with automatic handset and handset capabilities recognition

The Unique Client Adaptor for Optimization and Configuration

Based on market research and customer input, O3SIS continuously performs mobile phone reference tests for optimized synchronization and configuration for:
Advanced server side field mapping and conflict handling – configured through the Gemalto Client adaptor.

- Over-the-Air device configuration & help for synchronization,- e-mail and OMA EMN
- Over-the-Air Download, installation and update of Clients
- Mobile channel optimization

Handset data coverage – more than 1,000 mobile phones supported

O3SIS ensures a strong dedicated Device On-boarding and Client R&D program to continuously extend the device support base for latest mobile phone operating systems and platforms, as well as more media types to be added.

Based on the OMA DS (SyncML) synchronization as the leading industry standard for data backup and synchronization, O3SIS supports any OMA DS 1.0, 1.1 and 1.2 compliant mobile phone with native Sync Clients and currently can be used with hundreds of commercially available mobile devices for basic data synchronization.

Native Device clients support:

We have reference tested and certified over 700 (Q1/10) mobile phones equipped with a native SyncML Client for backup and restore of PIM data (Contacts, Calendar and Notes). Additionally the On-Boarding program ensures support for Over-the-Air Configuration OMA EMN, E-mail and browser content optimization for the mobile interfaces.

O3SIS Device Client Suite:

Over 450 Smartphones and Feature Phones are additionally supported for backup of additional Multimedia file types with the O3SIS Device Client Suite.

It enables O3SIS customers and partners to introduce all-embracing backup and synchronization services for mobile device content. The O3SIS Client Suite roadmap is targeting today's primary Smartphone platforms in the market, such as iPhone, BlackBerry, Android, Windows Mobile and Symbian as well as J2ME phones such as Samsung, Nokia, Sony Ericsson.
